Department of Electronics & Telecommunication Engineering

Program Specific Outcomes (PSOs):

PSO1: Student will be interpret concept of signal processing, communication, networking, embedded systems, VLSI and control system. Also infer deferent components with there ailed measurement techniques using electronic instruments and measuring devices.

PSO2: Apply the concept in above mention domain, design and develop electronic solution for industrial , society and environment needs.

PSO3: Add the value using cutting edge technology viz SoC, NoC, ULSI etc with industry sponsor projects and publication and IP's
